

BEAM

Maria Vafiadis

TA

FL

Beam rappresenta un'evoluzione nell'interpretazione della "lampada di scopo", dall'inglese "task light", categoria a cui appartengono le lampade da scrittoio e da lettura. L'innovazione è rappresentata dal fatto che si muove la luce e non la lampada. Attraverso il pulsante a tre fasi, la luce diventa orientabile ed indirizzabile a seconda della necessità di chi la usa, senza dover muovere la struttura.

Beam represents an evolution in the interpretation of the "lamp of purpose", from the English "task light", a category lamps for writing and reading belong to. Innovation is represented by the fact that what is moving is the light, but not the lamp. Through the three-phase switch, the light becomes adjustable and addressable according to the user's needs without having to move the structure.
